Chapter 7 - Introduction Chapter 7 - Introduction "The Organizational Culture of an
Organization Affects the Way the Organization Exercises Its Authority." Chapter 7 -
Introduction "The Organizational Culture of an Organization Affects the Way the

Organization Exercises Its Authority.” One of the most important aspects of any organization is its culture. The culture of an organization is based on what values the organization holds. Some examples of values that may make up the culture of an organization are the following: the organization’s mission, what the organization wants to achieve, the importance of the organization, what makes the organization unique.

An organization’s culture is also based on the organization’s values. There are different ways that an organization’s values affect the organization’s culture. For example, if an organization has the value of striving for excellence, this value will have a major impact on the culture of the organization. This will make the organization strive to achieve excellence in everything that it does, including its culture. One of the ways that the culture of an organization affects its authority is that if the culture of an organization is based on submission and obedience, the organization will feel that it has authority over its members. Authority is the right to control. The culture of an organization also affects how the organization exercises authority. The level of obedience is one way the culture of an organization affects its exercise of authority. Another way in which the culture of an organization affects its exercise of authority is that if the culture of an organization is based on goals, the organization will set goals for its members and set certain standards for its members. If the culture of an organization is based on goals, the organization will also expect that its members achieve the goals that the organization has set for them. Some organizations have a culture that is based on a non-goal orientated way of setting standards. For example, some organizations base their standards on tasks. If a culture is based on non-goal orientated standards, it is impossible for the organization to expect that its members achieve the goals that the organization has set for them. Another way in which the culture of an organization affects its exercise of authority is that if the culture of an organization is based on rule, the organization will have rules and standards that it expects its members to follow. One way that the culture of an organization affects the authority that the organization has over its members is that if the culture of 2d92ce491b
