

Linking to a product that offers the. Peptide 21 aa sequence #: 32310143147 Fernando Alonso has been back on the track with McLaren-Honda for just one day, but already he's started making noises about a return to the cockpit of his 2015 machine next season. The Spaniard has been linked with a switch to Renault for the 2016 campaign ever since his 2014 retirement from Formula 1, but a trip to the McLaren factory for a promotional photo shoot and a series of interviews - in which he made it clear that he might join Renault next season - inevitably put the link back on the radar again. But Alonso has his eyes on F1. He has told Spanish newspaper Mundo Deportivo that he could be back in a McLaren-Honda next season. "I see myself at McLaren-Honda next year," he said. "It's my preference. As a driver I need to be in the fight with the best. The truth is I need to beat the best to keep driving. I do not want to look at what is happening on the outside. I have to think about myself. My future. My family." And there is another aspect to Alonso's thoughts, with the Spanish driver keen to return to a team in which he was at his best in 2015. "My comeback is tied to McLaren-Honda," he said. "They are the team I had the most fun with, and the only team that gave me the opportunity of becoming one of the best drivers of the world." "If I had a choice I would definitely return to McLaren-Honda. Now the story is that Honda is the priority, but I have to wait. If McLaren-Honda has everything, then yes, I will be there." But he admits that if McLaren-Honda does not come to terms with him by the end of 2016, he would look elsewhere. "If they do not accept me, I will take another option, wherever I am the best, wherever I am the most comfortable," he said. "It will be a new life, but a great one." Alonso's replacement at McLaren this season is Canadian rookie Lando Norris, and the Spaniard is confident he will have a strong season. "I want to say that Lando is a really good guy and he is a good driver," he said. "I know him well. He is a
