Nov 17, 2017 The most fascinating chess opening is 1Nf3, which boasts game positions of legendary players such as Karpov, Kasparov, Korchnoi and Topalov. With 1...d5 Black aims to play for a more solid center and to bring in pawn play on the wings. The modern theory of the game usually advocates the continuation 1...e6 as White, with the plans of playing e5 and dxe5 with the idea of weakening the center. Fooling with an early e4 is a popular theory, but the position remains a nightmare for White. In addition to a problematical e4, the e-pawn is weak and vulnerable, since the position of the pawn allows the move...Bb6 in order to push f2-f3. In such a case, the queen bishop is good on the d4-square and promotes to an ideal piece. 1Nf3 is occasionally a "restless" opening, but it has a long and varied history. It is a popular choice in GM games and has a fair number of complex variations. In a survey by Chessmetrics, the most played opening was 1Nf3, and it is also the one with the most variations per game, with almost five variations per game.
